MSc., Industrial Psychology`

2002-2005 Tel Aviv University, Israel
B. A., Psychology (*magna cum laude*) and Economics

2. RESEARCH AND SCHOLARLY ACTIVITIES

RESEARCH PROGRAM

My research looks at how the social context impacts employees' decision making. I examine situations in which people in organizational settings behave in ways that run counter to what one would expect them to do when seeking a specific goal because of

innate social needs, such as the need to belong or the need for social status. Importantly, I apply psychological theories to critical organizational challenges (e.g. how organizations should structure employees' jobs; How should organizations design their selection practices?) to seek solutions that improve employees' lives at the workplace and organization's success. I use multi-methods approach, combining field surveys, field experiments, laboratory experiments and archival data analysis.

The focus of my research revolves around two specific areas: (1) behavioral ethics (2) selection decisions and biases.
